## OBJECTIVE ||

I am a PHP Developer (PHP, Laravel, MySQL) with experience of working on a variety of web development projects. I work on all aspects of the development life cycle, applying my knowledge of OO PHP and MVC principles. My past work includes building user-focused, dynamic, innovative and functional websites using responsive / adaptive / mobile-first design and development. I have good HTML/CSS/Javascript knowledge.

## KEY PROJECTS ||

I developed a Complaint Management System which converted emails to complaints and assigned them automatically. This then tracked the complaints to closure, with a high level of automation, saving the employer having to hire two new people.

I developed a bespoke ticket reservation system for a client, which automated reservation of tickets and handled enquiries as to availability / other routine enquiries automatically. This saved the client having to hire five more people to handle the volume of queries.

## KEY SKILLS ||

- PHP, Laravel, MySQL
- OOP and MVC principles
- Proficient in Javascript
- Intermediate HTML and CSS
- CMS – Magento, Drupal, Wordpress, Joomla
- Version Control - Git
- Bootstrap / jQuery
- SASS/LESS
- Experience of building and integrating with API (REST and SOAP)
- Ability to develop and maintain front and back-end code to a high standard and to agreed timescales
- Ability to review other developers' solutions and code
- Ability to provide clear regular progress updates to managers and stakeholders
- Ability to produce comprehensive documentation
- Able to act as first-line technical support for issues and bugs

## QUALIFICATIONS ||

BSC (HONS) COMPUTER SCIENCE (2:1)

UNIVERSITY OF BIRMINGHAM, 2011-2014

Modules covered included Artificial Intelligence, Data Structures and Algorithms, Logic and Computation, Object Oriented Programming, Full Stack Application Development, Human-Computer Interaction, Intelligent Robotics, Machine Learning and Intelligent Data Analysis, Security of Real-World Systems and Theoretical Foundations for Security.

## WORK EXPERIENCE ||

My role at this company was to assist with supporting software systems, develop new features / projects, and provide occasional hardware support. Part of an in-house team, my responsibilities also included:

- Diagnosing and fixing bugs
- Scoping out and developing new features in line with a specification and to a deadline
- Providing occasional hardware support
- Making improvements to Interfaces and adding new features

I was made redundant from this role.

Working for this digital agency, I was responsible for scoping, estimating and testing websites and web-based software for clients. Working as part of a team, I created, developed and finalised projects, many of which were used on a day-to-day by millions of people. I worked closely with the different teams including design, project management and sales to ensure the end result was perfect for the client. This role was 4 days a week and I left for a full time position.

The company is a financial organisation with sites in 5 European countries. My responsibilities included:

- Involvement with a range of projects large and small
- Liaising directly with clients, taking briefs and developing user stories
- Assisting with the maintenance and availability of applications, ensuring best code practice

I left this position due to relocating to London.

---

## HOBBIES AND INTERESTS ||

- Going to the gym
- Road cycling
- Boulderling
- Bungee jumping
